Title of Exercise : Referencing in Different Styles

Name of the candidate : Pragaadesh C

Register Number : RA2512019010001

Date of Exercise : 25/11/2025

S.No	Marks Split Up	Maximum Marks	Marks Obtained
1	Format Accuracy Across Styles	5	
2	Consistency in Application	5	
3	Completeness of Reference Elements	5	
4	Technical Precision	5	
	Total	20	

Staff Signature

Experiment:4

Question: Write the reference in all three styles.

The following paper needs to be cited in APA, IEEE, and MLA:

- Author: Sharma, R. & Gupta, A.
- Title: Advances in EV Charging Systems
- Journal: International Journal of Power Electronics, Vol. 15, No. 2, pp. 101–120, 2024.

Aim

Description

1. Style Name
 - a. Key Features of the Style
 - b. Format
2. Style Name
 - a. Key Features of the Style
 - b. Format**

Aim

To understand and apply different reference styles APA, IEEE, and MLA for citing a journal article correctly.

Description:

Referencing styles define specific rules for citing sources in research work. Each style differs in format, punctuation, author order, and date placement.

Standardized guidelines for properly citing the sources of information (thoughts, quotations, facts, etc.) used in academic writing are known as referencing styles. They act as a guide, making it simple for readers to find the sources you used and helping you to properly acknowledge the original author.

Understand the origin of the content, verify the references, and explore further readings. The selection of a referencing style often depends on the discipline, requirements of the institution, or personal preference. Below, we will explore six major referencing styles—APA, MLA, Chicago/Turabian, Harvard, IEEE, and Vancouver—focusing on their structure, application, and conventions. Using the provided reference, we will illustrate how each style formats the citation differently.

1. APA (American Psychological Association)
2. MLA (Modern Language Association)

3. Chicago/Turabian (Chicago Manual of Style)
4. Harvard
5. IEEE (Institute of Electrical and Electronics Engineers)
6. Vancouver

1. APA (American Psychological Association) Style

a. Key Features of the Style

1. Author's surname followed by initials.
2. Year of publication in parentheses immediately after authors' names.
3. Title of the article in *sentence case*.
4. Journal name in *italics* and *title case*.
5. Volume number in *italics*, issue number in parentheses, followed by page range.

b. Format

Format Template:

Author(s). (Year). *Title of the article. Journal Name, Volume(Issue)*, page range.

Example (APA):

Sharma, R., & Gupta, A. (2024). *Advances in EV charging systems. International Journal of Power Electronics, 15(2)*, 101–120.

2. IEEE (Institute Of Electrical And Electronics Engineers) Style

a. Key Features of the Style

1. Numerical citation style (e.g., [1]).
2. Authors' initials precede surnames.
3. Article title in quotation marks.
4. Journal name in *italics*.
5. Includes volume, issue, page numbers, and year at the end.

b. Format

Format Template:

[Number] Initial(s). Surname and Initial(s). Surname, "Title of the article," *Journal Name*, vol. x, no. y, pp. xxx–xxx, Year.

Example (IEEE):

[1] R. Sharma and A. Gupta, "Advances in EV charging systems," *International Journal of Power Electronics*, vol. 15, no. 2, pp. 101–120, 2024.

3. MLA (Modern Language Association) Style

a. Key Features of the Style

1. Author names as they appear (first author's surname first).
2. Year appears at the end of the citation.
3. Article title in quotation marks with *title case*.
4. Journal name in *italics*.
5. Volume and issue numbers separated by a comma.
6. Uses "pp." before page range.

b. Format

Format Template:

Author(s). "Title of the Article." *Journal Name*, vol. x, no. y, Year, pp. xxx–xxx.

Example (MLA):

Sharma, R., and A. Gupta. "Advances in EV Charging Systems." *International Journal of Power Electronics*, vol. 15, no. 2, 2024, pp. 101–120.

Inference:

Proper citation ensures credibility and acknowledges original authors.

APA, IEEE, and MLA styles differ in format but share the goal of maintaining academic integrity.
