

**LAM Research India
&
CeNSE IISc supported
Course on**

SEMICONDUCTOR VIRTUAL NANOFABRICATION

An Institute Professional Elective Course

A specially designed course under the program
LAM Research India - CeNSE IISc Semiconductor
Skills Development through SEMulator3D

You will learn

1

**BASICS OF SEMICONDUCTOR NANOFABRICATION
UNIT AND MODULE PROCESSES**

2

**MATERIALS ENGINEERING OF LOGIC, MEMORY,
DISPLAY, SENSORS, PV DEVICES.**

3

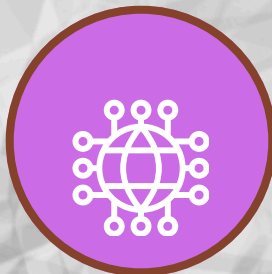

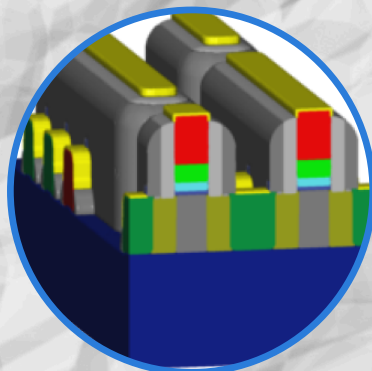

**FROM LAYOUT CREATION TO SEMICONDUCTOR DEVICE
PROCESS INTEGRATION**

4

**VIRTUAL FABRICATION OF NANOELECTRONIC DEVICES
USING AN ADVANCED EDA SIMULATION PLATFORM**

WHAT'S MORE

An opportunity to learn SEMulator3D
- A unique software tool for
modeling CMOS and MEMS process
sequences in 3D

WHY IT IS IMPORTANT

Multiple semiconductor FABs,
ecosystem being established in
India require huge workforce
trend in semiconductor
manufacturing technologies

JOB OPPORTUNITIES

Semiconductor work force
demand by ISM by 2030-

- 5000 PhDs
- 30000 engineers
- 50000 techs

WHO CAN APPLY

M.Tech./Integrated M.Tech./ Ph.D.
students of any discipline with a
strong desire to build a career in
semiconductor industry

- Assessment Test by IISc conducted at the end of the semester
- Free participation in an Advanced Training Program for selected candidates
- Training designed and mentored by experts from IISc
- Enhance your resume and higher-studies profile
