

Category	Description	Package A	Package B
		8D7N (Johor) 3D2N (Kuala Lumpur) per pax in USD	10D9N (Johor) per pax in USD
Accommodation	All-inclusive stay for 10 days/9 nights	260	150
Meals	4 meals per day (lunch and dinner are not included during 2 days of outing / external visits)	160	150
Training & Administration Fee	Comprehensive academic fee (5 days) which includes: - Hands-on lab sessions & problem-based projects - Access to equipment, software & facilities - Professional instruction & programme coordination - Module-based assessment using structured rubrics (practical tasks, participation, and final presentation) - Certificate awarded upon completion. - Industry visits	440	380
Transportation	Fully covered local transportation - Airport pick-up and drop-off - Daily transfers between accommodation and training venues - Intercity travel (Johor Bahru ↔ Kuala Lumpur) for Option A - Transport for industry visits and tours	150	100
Tax	Applicable taxes included	290	220
TOTAL COST		1300	1000

PACKAGE A

Date	Day	Morning Session (9am-12pm)	Afternoon Session (2pm-5pm)
2-Aug	Day 1	Arrival at Senai International Airport, Johor	
3-Aug	Day 2	Module 1: Computer Aided Engineering	Module 1: Computer Aided Engineering
		Basic engineering design using Solidworks: - 2D sketching - 3D modeling	Product visualization and realization: - assembly modeling and animation - engineering drawing - 3D printing
4-Aug	Day 3	Module 2: Robotic	Module 2: Robotic
		Robotic system, end-effectors, actuator 1. Introduction to Industrial Robotics Arm (30 min) 2. Robot Kinematics & Drive Systems (30 min) 3. Hands-on: Familiarization (1 hour) 4. Programming & Control (1 hour)	Programming robotic arm 5. Group Challenge & Reflection Mini-project (pick and place task)
5-Aug	Day 4	Module 3: Control and automation via PLC	Module 3: Control and automation via PLC
		PLC architecture and ladder diagram - input/output modules - signal flow from sensor to PLC to actuator - mapping exercise for simple system - ladder diagram development	Develop PLC program - design ladder diagram based on the given requirement - simulation and demonstration
6-Aug	Day 5	Module 4: AI vision system	Module 4: AI vision system
		AI in vision system, basic image processing, object detection concept - hands-on with edge computing	- Camera interfacing and object detection
7-Aug	Day 6	Morning Session (8.30am-12.30pm)	Afternoon Session (2.30pm-4.30pm)
		Module 5: Instrumentation and IoT	Visit to Huibo, Reflection & Closing Ceremony
		Session 1: 830am - 1030am (Instrumentation) - Basic principles and measurement of sensors and instrumentation - Hands-on sensor measurement and calibration - Data acquisition using ESP32	230-330pm : Visit to Lab Huibo 330-430pm : Reflection & Closing ceremony (award/cert presentation)
		Session 2: 1030am - 1230am (IoT) - Introduction to IoT, MQTT protocol and Node-red - Hands-on : Develop IoT system	
8-Aug	Day 7	Johor City Tour / Johor Premium Outlet	
9-Aug	Day 8	Johor to Kuala Lumpur /Kuala Lumpur Tour	
10-Aug	Day 9	Visit to industry	
11-Aug	Day 10	Depart from KLIA Airport	

PACKAGE B

Date	Day	Morning Session (9am-12pm)	Afternoon Session (2pm-5pm)
2-Aug	Day 1	Arrival at Senai International Airport, Johor	
3-Aug	Day 2	Module 1: Computer Aided Engineering	Module 1: Computer Aided Engineering
		Basic engineering design using Solidworks: - 2D sketching - 3D modeling	Product visualization and realization: - assembly modeling and animation - engineering drawing - 3D printing
4-Aug	Day 3	Module 2: Robotic	Module 2: Robotic
		Robotic system, end-effectors, actuator 1. Introduction to Industrial Robotics Arm (30 min) 2. Robot Kinematics & Drive Systems (30 min) 3. Hands-on: Familiarization (1 hour) 4. Programming & Control (1 hour)	Programming robotic arm 5. Group Challenge & Reflection Mini-project (pick and place task)
5-Aug	Day 4	Module 3: Control and automation via PLC	Module 3: Control and automation via PLC
		PLC architecture and ladder diagram - input/output modules - signal flow from sensor to PLC to actuator - mapping exercise for simple system - ladder diagram development	Develop PLC program - design ladder diagram based on the given requirement - simulation and demonstration
6-Aug	Day 5	Module 4: AI vision system	Module 4: AI vision system
		AI in vision system, basic image processing, object detection concept - hands-on with edge computing	- Camera interfacing and object detection
7-Aug	Day 6	Morning Session (8.30am-12.30pm)	Afternoon Session (2.30pm-4.30pm)
		Module 5: Instrumentation and IoT	Visit to Huibo, Reflection & Closing Ceremony
		Session 1: 830am - 1030am (Instrumentation) - Basic principles and measurement of sensors and instrumentation - Hands-on sensor measurement and calibration - Data acquisition using ESP32	230-330pm : Visit to Lab Huibo 330-430pm : Reflection & Closing ceremony (award/cert presentation)
		Session 2: 1030am - 1230am (IoT) - Introduction to IoT, MQTT protocol and Node-red - Hands-on : Develop IoT system	
8-Aug	Day 7	Johor City Tour / Johor Premium Outlet	
9-Aug	Day 8	Pontian/Kukup/Tanjung Piai	
10-Aug	Day 9	Visit to industry	
11-Aug	Day 10	Depart from Senai International Airport, Johor
